

AI Smart Estimator

From Showroom to Screen — The Complete Digital Sales Platform

Presented to Grazia Stones | RAGSPRO Digital Solutions

Follow-up Presentation — August 2026

Why Walk-In Customers Walk Away

Every stone/tile business faces the same four leaks — Grazia included.

Customers can't visualize the result

They can't picture a design on their actual wall until it's already installed — leading to hesitation, returns, and lost trust.

Estimation is manual and slow

Every inquiry needs someone to mentally calculate tile quantity and cost — slows down walk-ins, dealers, and phone inquiries alike.

Leads get lost

WhatsApp, phone calls, and walk-ins all live in different places — no single system tracks who's interested in what.

The next generation buys differently

Buyers now research on their phone before ever visiting a showroom. Brands with zero digital presence lose that moment entirely.

THE OPPORTUNITY

Every Customer Becomes Their Own Showroom

AI + AR puts Grazia's entire catalogue in a customer's pocket — on their own wall, instantly, before they ever pick up the phone. One platform, three winners: the customer gets certainty, the dealer gets tracked leads, and Grazia HQ gets full control.

WHERE WE LEFT OFF

Last Friday's Review — Live Web Demo

We walked through the working web preview together and reviewed the full proposal.

WHAT WAS SHOWN

AI wall visualization, live AR tile placement, wall measurement, tile quantity + cost estimator, and the full MVP proposal at ₹1,49,000 — with the request to refine the experience further before final sign-off.

SINCE THEN

What We Improved, As Requested

Every round of feedback has already been built into the live app — not just promised.

Complete luxury UI/UX redesign

Every screen re-styled to match Grazia's premium, architectural brand positioning — not a generic template look.

Production-grade AR wall tracking

Polygon-based masking with true pixel-level occlusion — tiles now sit realistically on the wall, no more "floating" overlay look.

Steadier, stable wall lock

State-machine based tracking handles shaky camera movement and stale detection gracefully.

Cart, checkout & navigation polish

Smoother spacing, responsive bottom navigation, and refined interactions across every screen.

THE PLATFORM

Core AI + AR Experience

This is what the customer sees and touches.

- **Real AI Wall Visualization**
Photorealistic preview of any design on the customer's actual wall
- **Real AR — Android + iPhone**
Live camera placement, no markers or printouts needed
- **Automatic Wall Detection**
Detects wall surfaces on its own for accurate placement
- **Automatic Tile Fit**
Tiles auto-align and scale to the detected wall size

- **Live Swipe Design Compare**
Switch between stone/tile designs instantly on the same wall
- **AI Room Photo Mode**
Upload a room photo to visualize without live AR
- **Wall Measurement**
Height × width captured directly from the camera
- **Tile Qty + Cost Estimator**
Auto-calculates boxes needed and instant price — with shareable PDF quote

THE PLATFORM

Business & Growth Engine

This is what runs behind the scenes for Grazia and its dealer network.

Admin Panel

Manage products, pricing, designs, and the entire catalogue centrally — update once, reflect everywhere.

Dealer Panel & Lead Management

Every dealer gets their own login. Every lead is tracked and assigned — nothing slips through WhatsApp again.

Payment Gateway & Online Ordering

Accept payments and orders directly in-app — turns a browsing session into a closed sale.

Play Store + App Store Presence

Full submission on both platforms — Grazia becomes a real, installable brand, not just a showroom.

THE PAYOFF

Why This Wins For Grazia

Not just an app — a sales advantage competitors don't have yet.

Fewer wasted showroom visits

Customers arrive already sure of the design — sales conversations start at "yes", not "maybe".

Faster decisions, faster closes

Instant AI visualization + instant cost estimate removes the biggest delay in every sale: uncertainty.

Dealer network becomes a lead engine

Every dealer login feeds tracked leads back to Grazia HQ — visible, measurable, no longer invisible.

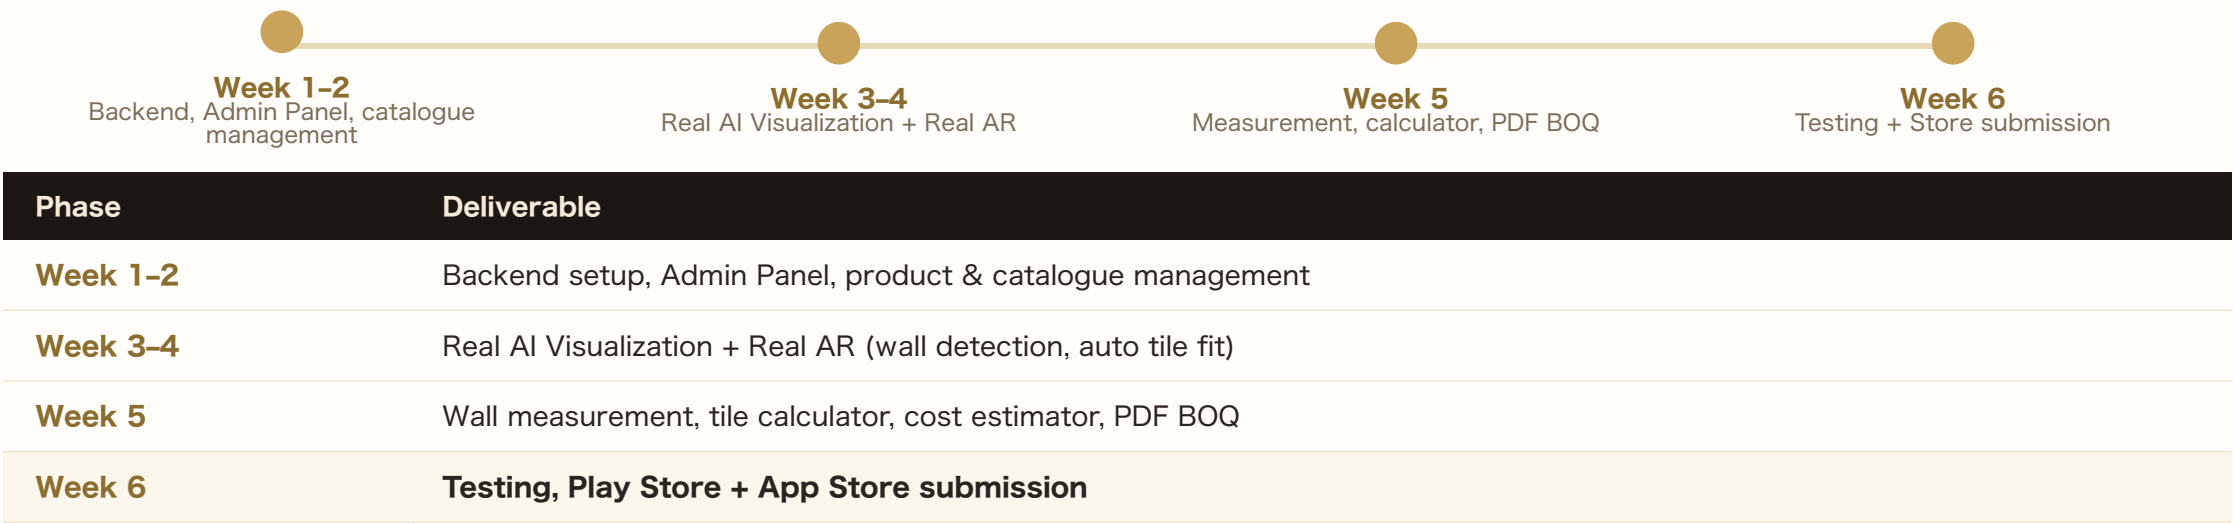

Most tech-forward stone brand in the market

Real AI + AR — not a gimmick — positions Grazia ahead of every competitor still using catalogues and phone calls.

EXECUTION

Timeline — Live in 6 Weeks

From go-ahead to store submission, fully scoped week by week.

One Number, Everything Included

Standard Price

₹1,49,000

Your Price Today

₹1,45,000

FINAL DISCOUNTED PRICE

₹1,45,000

One-time development cost — every feature on slides 6 & 7 included

You save ₹4,000 — loyalty discount for confirming this month

FULL TRANSPARENCY

The Only Other Costs — Shown Honestly

Real third-party costs to run and publish the app — zero markup, ever.

Item	Cost	Notes
Google Play Developer Account	₹2,100 (one-time)	Required to publish on Play Store
Apple Developer Program	₹8,500 (per year)	Required to publish & stay live on App Store
Backend Server & Database Hosting	₹2,500 – ₹4,000 /month	Billed at actual usage, scales with traffic
AI Visualization API Usage	₹3,000 – ₹7,000 /month	Billed at actual consumption only

Estimated running cost once live: **₹5,500 – ₹11,000/month** — only once customers are actively using the app.

STRUCTURED SIMPLY

Payment Schedule

Three milestones, tied to visible progress — not blind trust.

40% — ₹58,000			30% — ₹43,500			30% — ₹43,500		
Milestone			Payment			Amount		
Advance — on agreement sign-off			40%			₹58,000		
Midway — on AI/AR module demo			30%			₹43,500		
On delivery — before store publish			30%			₹43,500		
Total			100%			₹1,45,000		

YOUR PARTNER

Why RAGSPRO

Founder-led, single point of contact

No account managers, no relay — you talk directly to the person building it.

Already built and demoed

This isn't a pitch on paper — the AI/AR engine is live and working today.

No hidden markup on running costs

Server, AI API, and store fees always shown at actual invoice.

30 days free post-launch support

Bugs fixed at no cost after go-live.

LET'S MOVE

Next Steps

Sign today to lock in the
₹1,45,000 rate — valid 7 days
from this meeting

Pay the 40% advance
(₹58,000) to kick off
immediately this week

Live on Play Store + App Store
in 6 weeks from go-ahead
