GRAZIA STONES

AI Smart Estimator™ — Development Proposal

Prepared by: RAGSPRO

Prepared for: Grazia Stones

Date: August 7, 2026

Contact: raghav@ragspro.com

1. Where We Are

Phase 1 (Demo) is complete and live at **grazia-stones.vercel.app**: a 15+ screen premium Flutter app with the full catalogue browsing flow, AR camera mock, AI visualization UI, cart, and dealer locator UI, built to secure internal approval.

What Grazia now wants goes well beyond a catalogue app: real wall detection, automatic tile placement, live design switching, AI-generated room visualization, and automatic wall measurement with a cost estimate. This turns the product into an **AI Smart Estimator™**, not just a viewer. That is a bigger, more valuable build than Phase 1 — priced and scoped accordingly below.

2. What "Real AI" and "Real AR" Mean Here

These terms mean different things to different people. To avoid scope disputes later, here is exactly what this proposal delivers:

- **Wall Detection + Auto Tile Fit (AR Mode):** Camera opens, detects the wall surface, and fits the selected stone onto it with correct perspective — using ARKit (iOS) / ARCore (Android) plane detection and anchoring.
- **Live Design Switching:** Swipe between stones/collections while the AR view stays anchored on the same wall.
- **AI Photo Mode:** User uploads a room photo; the app detects the wall region and generates a realistic version with the selected stone applied (lighting- and shadow-aware), via a third-party generative AI API (Replicate / OpenAI / Stability).
- **AI Smart Estimator™:** AR-based wall measurement (height × width × area), automatic tile quantity calculation (with wastage %), cost estimate at your ₹/sqft rate, and a downloadable PDF quote that can be sent to the nearest dealer on WhatsApp.

This is real computer vision + generative AI + AR, not a static image overlay. It touches backend, admin panel, and three device-level AI/AR systems — which is why it is priced well above a standard app build.

3. Packages

PACKAGE 1 Core AI + AR ₹1,50,000 • Real camera + wall detection • Automatic tile placement (perspective-fit) • Live design switching (swipe) • AI photo mode (upload → AI-generated wall) • Backend + Admin panel • Dealer locator + lead capture • Android + iOS, Play Store + App Store deployment	PACKAGE 2 — RECOMMENDED + AI Smart Estimator™ ₹2,00,000 • Everything in Package 1, plus: • Auto wall measurement (AR-based height/width/area) • Tile quantity calculator + wastage buffer • Cost estimator (₹/sqft × area) • Downloadable PDF quote (BOQ) • Send quote to dealer via WhatsApp	PACKAGE 3 + Precision Accuracy ₹2,50,000 • Everything in Package 2, plus: • LiDAR support on compatible iPhones • Improved AR anchor stability + occlusion • Faster wall detection • Higher-fidelity texture + lighting mapping
--	--	--

Third-party AI API usage (Replicate / OpenAI / Stability etc. for photo-mode generation) is billed separately based on actual usage, and is not included in the package price above.

4. Timeline

Stage	Duration	Deliverable
Backend + Admin + Flutter completion	Week 1–2	Real data model, product/dealer/lead management
AI Visualization + AR Wall Detection	Week 2–4	Camera-based wall detect, auto tile fit, AI photo mode
AI Smart Estimator™ (Package 2/3)	Week 4–5	Measurement, tile calculator, cost estimate, PDF quote
Testing + Store Deployment	Week 5–6	App live on Play Store & App Store

Total: **4–6 weeks** from scope sign-off, depending on package selected.

5. Scope Freeze — Feature Sign-off

Please confirm the features below before development starts. Anything not checked here is treated as a new request and quoted separately once the build is underway — this keeps the timeline and price above accurate.

Feature	Included?
Camera opens → wall auto-detected	☐ Yes / ☐ No
Tile automatically fits wall with correct perspective	☐ Yes / ☐ No
Swipe to switch designs live, AR stays anchored	☐ Yes / ☐ No
Upload room photo → AI generates new stone on wall	☐ Yes / ☐ No
Auto wall measurement + tile qty + cost estimate + PDF	☐ Yes / ☐ No
LiDAR-grade precision (Package 3 only)	☐ Yes / ☐ No

6. Payment Terms

- **40% advance** to begin — backend, admin, and AI/AR foundation
- **30% at midpoint** — on AI wall detection + tile placement working on real devices
- **30% on delivery** — app live on both stores, admin panel handed over

7. Not Included (Future Phase)

- Multi-tenant / white-label platform for other stone brands
- CAD/BIM Architect Portal
- Payment gateway / online ordering
- Custom-trained AI model (this proposal uses proven third-party AI APIs, not an in-house model)
